

ALPHA

GAS STERNDRIVE

Simple, solid, versatile, and fast. The ideal drive for everything from runabouts to pontoons to small cruisers. Exclusive maintenance-free features on the durable Alpha® drive include Permalube® U-joints that eliminate the need for periodic lubrication and an internal floppy vane water pump impeller located inside the drive unit. Other user-friendly features like the easily accessible drive lube monitor and Audio Warning System (optional on 3.0L) add peace of mind and added convenience for this proven workhorse.

Features

<ul style="list-style-type: none"> • Power Trim XD with hydraulic memory returns the drive to the preset trim position in the event it comes into contact with underwater objects. A MerCruiser®-exclusive feature standard on all drives. 	<ul style="list-style-type: none"> • Broadest range of factory propellers available.
<ul style="list-style-type: none"> • Greasable drive coupler that is accessible from inside the boat reduces the amount of time your boat is out of the water during routine maintenance. A MerCruiser-exclusive feature standard on all drives. 	<ul style="list-style-type: none"> • Built-in speedometer pickups. Integral speedometer pickup and associated passages are incorporated into the drive unit and transom assemblies for steadier, more accurate readings. The quick-disconnect feature makes servicing easier.
<ul style="list-style-type: none"> • 3-year Limited Corrosion Failure Warranty. A MerCruiser-exclusive feature on all standard-production gas and diesel sterndrive and inboard products. All aluminum components are cast with our exclusive XK-360 alloy, which contains very little copper for maximum corrosion resistance. Other corrosion-susceptible parts are built from the highest-grade stainless steel. As part of a demanding 14-step process, each coat of paint is baked on for maximum adhesion, while our exclusive Electro Deposition Priming ensures uniform, complete coverage. Electrostatically applied acrylic powder paint finishes the job. 	<ul style="list-style-type: none"> • Drive can be turned 28 degrees in each direction. • Internal floppy vane water pump impeller. A MerCruiser-exclusive design located in the Alpha drive unit requiring minimal maintenance.
<ul style="list-style-type: none"> • MerCathode® protection neutralizes corrosive galvanic electrical currents that can destroy metal components. A MerCruiser-exclusive feature standard on all Bravo® drives and available as a kit for the Alpha drive. 	<ul style="list-style-type: none"> • Maintenance-free Permalube U-joints (exclusive) eliminate the need for periodic lubrication. Standard on Alpha, Bravo One®, Two®, and Three®.
<ul style="list-style-type: none"> • Easily accessible drive lube monitor allows the drive lubricant to be checked from inside the boat. A MerCruiser-exclusive feature standard on all sterndrive models. 	<ul style="list-style-type: none"> • Shot-peened gears. • Stainless steel and aluminum props available.
<ul style="list-style-type: none"> • Audio Warning System. Alerts boater of low oil pressure, high engine temperature and low drive lubricant. Standard on all MerCruiser models except 3.0L. 	<ul style="list-style-type: none"> • Through-prop exhaust. • Trim-limit switch. Limits travel of drive to prevent drive damage from over trimming. • Designed to handle up to 300 hp. • All Alpha drive models now feature the proven Bravo-style maintenance-free hinge pins.

EFFECTIVE JULY 2003
